What Is a Tummy Tuck?

- Tummy tuck is a cosmetic surgical procedure designed to improve abdominal shape and contour.
- It can address excess skin and stubborn abdominal tissue that may not respond to diet and exercise.
- Depending on individual anatomy, the procedure may also involve tightening separated or weakened abdominal muscles.
- Treatment plans are customized according to your goals and physical condition.

Who May Consider Tummy Tuck?

Tummy tuck may be considered by people who have:

- Excess or loose abdominal skin
- A stretched abdominal appearance after pregnancy
- Significant skin laxity following weight loss
- Difficulty achieving the desired abdominal contour through lifestyle changes
- A desire for a more defined and proportionate abdomen

Loose Skin Removal Surgery Delhi

- Significant weight loss and pregnancy can sometimes leave excess abdominal skin.
- Tummy tuck surgery can remove selected excess skin and improve the overall abdominal contour.
- The amount of skin removed depends on your anatomy and surgical plan.
- Your surgeon will discuss expected results, scars, recovery, and potential risks before treatment.
